

Mission Statement

September 2007

To make short- and long-term action-oriented recommendations regarding the Islington Street Corridor which give it definition and physical expression reflective of its true character; promote healthy growth, improved circulation, and pedestrian and vehicular safety; and safeguard the existing positive qualities of the district and its adjacencies.

To likewise make short- and long-term action-oriented recommendations regarding the location, establishment, and development of an Arts District within the corridor, which will, in turn, define and support the unique emergent character and expression of the area.

These action items will take the form of general economic, policy, transportation, and open space recommendations which support the corridor's function, enhancement, and growth. And may include specific ideas and opportunities regarding the physical expression of the Arts District and key nodes and gateways along the corridor.
